# About

## Tifa Arts - Since 2001

We at Tifa USA vision the entire home as an art platform. We believe that by introducing a warm, artistic touch to an otherwise limited variety of material and design options, rather than using granite, tile, brick or paint, we transform the space to a personal reflection of your unique taste.

And that's where we at Tifa USA come in. With limitless design options using customized printed glass and personalized unique artistic layouts that changes the surface of any room , kitchen, bathroom, shower and even appliances and walls.

Behind the glass concept stands Yafit Riklin. An artist and a graphic designer.

The exclusive graphics created by Yafit begins on the drawing board and through a process that involves advanced technology and materials yielding design results that blends exquisitely in the home or office.

Everything starts with a one on one meeting with our design specialist who will walk you through the various design concepts and evaluate your personal preference and esthetics to bring your vision, imagination and desires to life.

We aspire to a great customer experience, personal and courteous service.

Let's envision  
together how your  
next project will  
look like
